

Grade 1 Module 1 Mid-Module Assessment Task

Item #	1a
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.3B (Readiness)
Strand	Number and operations.
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to use objects and pictorial models to solve word problems involving joining, separating, and comparing sets within 20 and unknowns as any one of the terms in the problem such as $2 + 4 = []$; $3 + [] = 7$; and $5 = [] - 3$.
Item Type	Multiple Choice
Question Stem	There were 5 friends at Lokit's party. Some more came after basketball practice. Then, there were 9. How many friends came to Lokit's party after basketball practice?
Prompt	Which picture would help you solve this problem?
Image(s)	<i>See images in answer choices below</i>
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	
Correct or Rationale	A is correct.
B	
Correct or Rationale	B is incorrect. Student thought the total and one part added together could be used to find the missing part.
C	
Correct or Rationale	C is incorrect. Student thought the total and the missing part added together would result in the known part.

Item #	1b
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.5D (Readiness)
Strand	Algebraic Reasoning
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to represent word problems involving addition and subtraction of whole numbers up to 20 using concrete and pictorial models and number sentences.
Item Type	Multiple Choice
Question Stem	There were 5 friends at Lokit's party. Some more came after basketball practice. Then, there were 9. How many friends came to Lokit's party after basketball practice?
Prompt	Which number bond can be used to represent this story?
Image(s)	<i>See images in answer choices below</i>
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	
Correct or Rationale	A is incorrect. Student represented the unknown part (4) as the total and represented the total (9) as one of the parts.
B	
Correct or Rationale	B is incorrect. Student represented the known part (5) as the total and represented the total (9) as one of the parts.
C	
Correct or Rationale	C is correct.

Item #	1c
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.5D (Readiness)
Strand	Algebraic Reasoning
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to represent word problems involving addition and subtraction of whole numbers up to 20 using concrete and pictorial models and number sentences.
Item Type	Equation editor (Math Short Answer)
Question Stem	There were 5 friends at Lokit's party. Some more came after basketball practice. Then, there were 9. How many friends came to Lokit's party after basketball practice?
Prompt	Write an addition sentence to match this story.
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
[RESPONSE1] Response(s)	$5 + 4 = 9$

Item #	2a
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.5F (Supporting)
Strand	Algebraic reasoning.
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to determine the unknown whole number in an addition or subtraction equation when the unknown may be any one of the three or four terms in the equation.
Item Type	Equation editor (Math Short Answer)
Question Stem	Look at the number sentences. $3 + 7 = \underline{\hspace{1cm}}$ $\underline{\hspace{1cm}} = 1 + 4$ $3 + 2 = \underline{\hspace{1cm}}$ $\underline{\hspace{1cm}} = 7 + 2$ $5 + 1 = \underline{\hspace{1cm}}$ $\underline{\hspace{1cm}} = 8 + 1$

	$9 + 1 = \underline{\hspace{1cm}}$ $\underline{\hspace{1cm}} = 2 + 6$ $6 + 4 = \underline{\hspace{1cm}}$
Prompt	Write the numbers that go in the blanks.
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
[RESPONSE1] Response(s)	$3 + 7 = \underline{\hspace{1cm}}$ 10 $\mathbf{5} \underline{\hspace{1cm}} = 1 + 4$ $3 + 2 = \underline{\hspace{1cm}}$ 5 $\mathbf{9} \underline{\hspace{1cm}} = 7 + 2$ $5 + 1 = \underline{\hspace{1cm}}$ 6 $\mathbf{9} \underline{\hspace{1cm}} = 8 + 1$ $9 + 1 = \underline{\hspace{1cm}}$ 10 $\mathbf{8} \underline{\hspace{1cm}} = 2 + 6$ $6 + 4 = \underline{\hspace{1cm}}$ 10

Item #	2b
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.3C (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to compose 10 with two or more addends with and without concrete objects.
Item Type	Multiple Select
Question Stem	
Prompt	Select the partners to 10. Select three that apply.
Image(s)	
Image(s) Alt Text	
Number of Points	3
Scoring	Partial Match
Rubric Notes	
Notes (where applicable)	
A	$3 + 7 = \underline{\hspace{1cm}}$
Correct or Rationale	A is correct.
B	$\underline{\hspace{1cm}} = 7 + 2$

Correct or Rationale	B is incorrect. Student may have tried to find the missing number by counting up 2 from 7, but counted one more than needed.
C	$\underline{\quad} = 1 + 4$
Correct or Rationale	C is incorrect. Student may have found the sum of 5 and thought that since 5 could be doubled to get 10, this equation was a partner to 10.
D	$\underline{\quad} = 9 + 1$
Correct or Rationale	D is correct.
E	$6 + 4 = \underline{\quad}$
Correct or Rationale	E is correct.
F	$\underline{\quad} = 2 + 6$
Correct or Rationale	F is incorrect. Student miscalculated when adding 2 and 6.

Item #	2c
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.3D (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to apply basic fact strategies to add and subtract within 20, including making 10 and decomposing a number leading to a 10.
Item Type	Multiple Select
Question Stem	
Prompt	Select all the +1 facts. Select three that apply.
Image(s)	
Image(s) Alt Text	
Number of Points	3
Scoring	Partial Match
Rubric Notes	
Notes (where applicable)	
A	$\underline{\quad} = 1 + 4$
Correct or Rationale	A is correct.
B	$5 + 1 = \underline{\quad}$
Correct or Rationale	B is correct.
C	$3 + 7 = \underline{\quad}$
Correct or Rationale	C is incorrect. Student may have thought that since the digit 1 is in the sum of 10, this is a + 1 fact.
D	$3 + 2 = \underline{\quad}$
Correct or Rationale	D is incorrect. Student may have subtracted $3 - 2$ rather than adding $3 + 2$ and arrived at a difference of 1.
E	$\underline{\quad} = 2 + 6$
Correct or Rationale	E is incorrect. Student mistook a +2 fact for a +1 fact.

F	$\underline{\quad} = 8 + 1$
Correct or Rationale	F is correct.

Item #	2d
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.3D (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to apply basic fact strategies to add and subtract within 20, including making 10 and decomposing a number leading to a 10.
Item Type	Multiple Select
Question Stem	
Prompt	Select all the +2 facts. Select three that apply.
Image(s)	
Image(s) Alt Text	
Number of Points	3
Scoring	Partial Match
Rubric Notes	
Notes (where applicable)	
A	$6 + 4 = \underline{\quad}$
Correct or Rationale	A is incorrect. Student may have subtracted $6 - 4$ rather than adding $6 + 4$ and arrived at a difference of 2.
B	$3 + 2 = \underline{\quad}$
Correct or Rationale	B is correct.
C	$\underline{\quad} = 7 + 2$
Correct or Rationale	C is correct.
D	$\underline{\quad} = 8 + 1$
Correct or Rationale	D is incorrect. Student confused a +1 fact with a +2 fact.
E	$\underline{\quad} = 2 + 6$
Correct or Rationale	E is correct.
F	$4 + 4 = \underline{\quad}$
Correct or Rationale	F is incorrect. Student thought that since both addends are the same, this is a +2 fact, OR student thought that since both addends are even, this is a +2 fact.

Item #	3a
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment

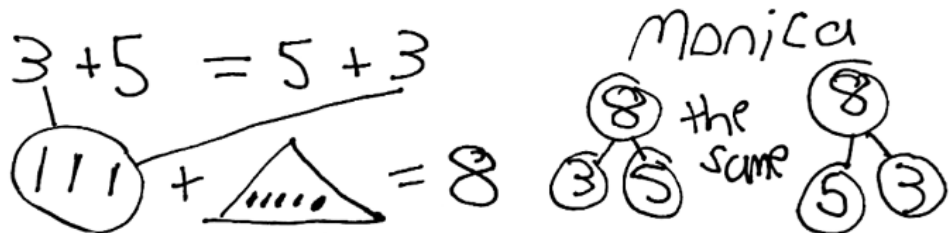

Standard (TEKS)	1.5G (Supporting)
Strand	Algebraic reasoning.
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to apply properties of operations to add and subtract two or three numbers.
Item Type	Equation editor (Math Short Answer)
Question Stem	Look at the party picture!
Prompt	Write at least two different addition sentences using 3, 6, and 9 that describe the party picture.
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
[RESPONSE1] Response(s)	$3 + 6 = 9$ $6 + 3 = 9$

Item #	3b
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.3E (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to explain strategies used to solve addition and subtraction problems up to 20 using spoken words, objects, pictorial models, and number sentences.
Item Type	Constructed Response
Question Stem	Look at the party picture!
Prompt	How are the two number sentences you wrote the same? Explain using pictures and numbers.
Image(s)	

Image(s) Alt Text										
Number of Points	1									
Scoring	n/a									
Rubric Notes	<table><tr><td>3(a) 1.5G 3(b) 1.3E</td><td>The student writes two incorrect number sentences. The student writes two correct and unique addition equations using 3, 6, and 9, but is unable to cite the commutative property in her own words to explain how the equations are same.	The student clearly <ul style="list-style-type: none">Writes two correct and unique addition equations that use 3, 6, and 9 ($9 = 6 + 3$, or $3 + 6 = 9$, or $9 = 3 + 6$, etc.).Demonstrates with pictures, numbers, and words how the number sentences are the same, somehow citing the commutative property in her own words.						
Notes (where applicable)	Because of the standard language and the connection between this item and 2a, this item should stay as a CR item type that requires students to explain/provide reasoning for the two equations they wrote in 2a. Making this machine-scored would significantly reduce a teacher’s ability to see student understanding.									

Item #	4a
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.5F (Supporting)
Strand	Algebraic Reasoning
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to determine the unknown whole number in an addition or subtraction equation when the unknown may be any one of the three or four terms in the equation.
Item Type	Inline choice
Question Stem	Monica says that when the unknown is 4, it makes this number sentence true: $5 + 3 = \underline{\hspace{1cm}} + 4$. Terry says she is wrong. He says 8 makes the number sentence true.
Prompt	Use the drop-down menu below to make Monica and Terry's number sentence true. $5 + 3 = [\text{DROPDOWN1}] + 4$
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	

Notes (where applicable)	
[DROPDOWN1] *correct	4* 8

Item #	4b
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.5G (Supporting)
Strand	Algebraic Reasoning
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to apply properties of operations to add and subtract two or three numbers.
Item Type	Constructed Response - Drawing AND text option
Question Stem	Monica says that 3 and 5 is equal to 5 and 3. Terry says she is wrong.
Prompt	Explain who is correct, using pictures, numbers, or words.
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Teacher scored
Rubric Notes	
Notes (where applicable)	

Item #	4c
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.5E (Supporting)
Strand	Algebraic Reasoning
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.

Student Expectation	The student is expected to understand that the equal sign represents a relationship where expressions on each side of the equal sign represent the same value(s)
Item Type	Constructed Response - Drawing AND text option
Question Stem	Next, Monica tells Terry $8 = 8$. Terry says she is wrong one more time.
Prompt	Explain who is correct, using pictures, numbers, or words.

Grade Level	Grade 1
Module	1
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.3E (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to explain strategies used to solve addition and subtraction problems up to 20 using spoken words, objects, pictorial models, and number sentences.
Item Type	Constructed Response
Question Stem	Jennifer says you can use addition to solve subtraction.

Prompt	Explain your thinking and show why Jennifer cannot solve $9 - 6 = \underline{\quad}$ by adding $9 + 6$. Use words, pictures, or numbers.
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Teacher scored
Rubric Notes	Teachers should use the rubric embedded in the curricular assessment.
Notes (where applicable)	

Item #	3
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.3E (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to explain strategies used to solve addition and subtraction problems up to 20 using spoken words, objects, pictorial models, and number sentences.
Item Type	Multiple Choice
Question Stem	Jeremy is confused about this problem: $\underline{\quad} = 10 - 8$.
Prompt	Which number sentence can help him understand and solve it?
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	$8 + ? = 10$
Correct or Rationale	Correct.
B	$10 + ? = 8$
Correct or Rationale	Student correctly identified the relationship between addition and subtraction, but added the incorrect term
C	$8 + 10 = ?$
Correct or Rationale	Student incorrectly identified the relationship between addition and subtraction.

Item #	4a
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.3B (Readiness)
Strand	Number and Operations

Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to use objects and pictorial models to solve word problems involving joining, separating, and comparing sets within 20 and unknowns as any one of the terms in the problem such as $2 + 4 = []$; $3 + [] = 7$; and $5 = [] - 3$.
Item Type	Multiple Choice
Question Stem	At the park, there are 6 friends playing baseball. Some more friends came. Now, there are 10 friends playing.
Prompt	How many friends came to play?
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
Letter of Option	A: 4
Correct or Rationale	Correct.
Letter of Option	B: 5
Correct or Rationale	Student may have attempted to find the difference between 6 and 10 by counting up from 6 to 10, but counted both 6 and 10 when doing so.
Letter of Option	C: 16
Correct or Rationale	Student added 6 and 10 instead of finding the difference between 6 and 10.

Item #	4b
Discipline	Math
Grade Level	Grade 1
Module	1
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.5D (Readiness)
Strand	Algebraic Reasoning
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.

Notes (where applicable)	
[RESPONSE1] Response(s)	$5 + 4 = 9$ $9 - 4 = 5$

Grade 1 Module 2 Mid-Module Assessment Task

Item #	1a
Discipline	Math
Grade Level	1
Module	2
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.3C (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to compose 10 with two or more addends with and without concrete objects.
Item Type	Multiple Choice
Question Stem	Pedro has 8 pennies. Anita has 4 pennies. Olga has 2 pennies.
Prompt	Whose pennies together make ten?
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	Pedro and Anita
Correct or Rationale	Student chose the pennies that make more than 10.
B	Pedro and Olga
Correct or Rationale	Correct.
C	Anita and Olga
Correct or Rationale	Student chose the pennies that make less than 10.

Item #	1b
Discipline	Math
Grade Level	1
Module	2
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.5D (Readiness)
Strand	Algebraic Reasoning
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to represent word problems involving addition and subtraction of whole numbers up to 20 using concrete and pictorial models and number sentences.
Item Type	Constructed Response
Question Stem	Pedro has 8 pennies. Anita has 4 pennies. Olga has 2 pennies.
Prompt	Represent the pennies Pedro, Anita, and Olga have in all using a math drawing and a number sentence.

Notes (where applicable)	Advice is to have students respond to this on paper despite the drawing option - the complexity of the response will be difficult for many students to draw digitally.										

Item #	1c
Discipline	Math
Grade Level	1
Module	2
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.3B (Readiness)
Strand	Number and operations.
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to use objects and pictorial models to solve word problems involving joining, separating, and comparing sets within 20 and unknowns as any one of the terms in the problem such as $2 + 4 = []$; $3 + [] = 7$; and $5 = [] - 3$.
Item Type	Equation editor (Math Short Answer)
Question Stem	Pedro has 8 pennies. Anita has 4 pennies. Olga has 2 pennies.

Prompt	How many pennies do Pedro, Anita, and Olga have in all?
Image(s)

OR Student explains well, and draws 5-groups well, but does not execute the bonds accurately.	Student correctly: <ul style="list-style-type: none">Models the number bonds and 5-group drawings.Explains how both problems equal 4 using numbers (i.e., $1 + 3 = 2 + 2$).		
						
Notes (where applicable)	Depending on the platform that is chosen, the $13 - 9 = 4$ may need to be pre-loaded in the drawing area for students to draw their number bonds onto.					

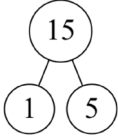

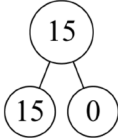

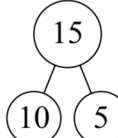

Item #	3b
Discipline	Math
Grade Level	1
Module	2
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.3E (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to explain strategies used to solve addition and subtraction problems up to 20 using spoken words, objects, pictorial models, and number sentences.
Item Type	Constructed Response
Question Stem	Write a number bond for the number sentence to show how to use ten to subtract. Draw 5-groups and some ones to show the subtraction sentence.
Prompt	$12 - 8 = 4$
Image(s)	
Image(s) Alt Text	
Number of Points	2
Scoring	Teacher Scored

Rubric Notes	A Progression Toward Proficiency				
	Assessment Task Item and Standards Assessed	Little evidence of reasoning without a correct answer.	Evidence of some reasoning without a correct answer.	Evidence of some reasoning with a correct answer or evidence of solid reasoning with an incorrect answer.	Evidence of solid reasoning with a correct answer.
	3(a) 1.3E 3(b) 1.3E 3(c) 1.5E	Student is not able to correctly accomplish any component of the task, demonstrating a lack of understanding of the problems.	Student may show some understanding and skill with 5-group drawings but is unable to execute the bonds or explain his thinking. OR Student is able to show the bonds but is unable to draw the 5-groups or explain appropriately.	Student draws the bonds and 5-groups but is unable to explain how both have an answer of 4. OR Student explains well, and draws 5-groups well, but does not execute the bonds accurately.	Student correctly: <ul style="list-style-type: none"> Models the number bonds and 5-group drawings. Explains how both problems equal 4 using numbers (i.e., $1 + 3 = 2 + 2$).
					
Notes (where applicable)	Depending on the platform that is chosen, the $13 - 9 = 4$ may need to be pre-loaded in the drawing area for students to draw their number bonds onto.				

Item #	3c
Discipline	Math
Grade Level	1
Module	2
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.5E (Supporting)
Strand	Algebraic Reasoning
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to understand that the equal sign represents a relationship where expressions on each side of the equal sign represent the same value(s).
Item Type	Constructed Response
Question Stem	Use your pictures and numbers to explain how both subtraction problems equal 4.
Prompt	$13 - 9 = 4$ $12 - 8 = 4$

Item #	4a
Discipline	Math
Grade Level	1
Module	2
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.2B (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to represent and compare whole numbers, the relative position and magnitude of whole numbers, and relationships within the numeration system related to place value.
Student Expectation	The student is expected to use concrete and pictorial models to compose and decompose numbers up to 120 in more than one way as so many hundreds, so many tens, and so many ones
Item Type	Multiple Choice
Question Stem	Mr. Baggy also has 15 snakes.
Prompt	Which number bond and number sentence show the number of snakes as a ten and some ones?
Image(s)	
Image(s) Alt Text	

Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	 $1 + 5 = 15$
Correct or Rationale	Student represented the 1 ten in 15 as 1 in the number bond and number sentence
B	 $15 + 0 = 15$
Correct or Rationale	Student chose an answer with a correct number sentence but an incorrect number bond since it shows 15 tens and 0 ones.
C	 $10 + 5 = 15$
Correct or Rationale	Correct.

Item #	4b
Discipline	Math
Grade Level	1
Module	2
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.5D (Readiness)
Strand	Algebraic Reasoning
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to represent word problems involving addition and subtraction of whole numbers up to 20 using concrete and pictorial models and number sentences.

Item Type	Multiple Choice
Question Stem	Mr. Baggy also has 15 snakes. Mr. Baggy sold some snakes. Now he has 5 snakes.
Prompt	Which number sentence represents the number of snakes Mr. Baggy sold?
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	$15 + ? = 5$
Correct or Rationale	Student chose an addition number sentence as opposed to a subtraction number sentence.
B	$15 - ? = 5$
Correct or Rationale	Correct.
C	$15 + 5 = ?$
Correct or Rationale	Student chose a number sentence that represents Mr. Baggy as getting 5 more snakes as opposed to having 5 snakes left over.

Item #	4c
Discipline	Math
Grade Level	1
Module	2
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.3B (Readiness)
Strand	Number and operations.
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to use objects and pictorial models to solve word problems involving joining, separating, and comparing sets within 20 and unknowns as any one of the terms in the problem such as $2 + 4 = []$; $3 + [] = 7$; and $5 = [] - 3$.
Item Type	Equation editor (Math Short Answer)
Question Stem	Mr. Baggy also has 15 snakes. Mr. Baggy sold some snakes. Now he has 5 snakes.
Prompt	How many snakes did Mr. Baggy sell?
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact match

Module	2
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.3F (Readiness)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to generate and solve problem situations when given a number sentence involving addition or subtraction of numbers within 20
Item Type	Multiple Choice
Question Stem	Which story about Mr. Baggy's pet store best represents the number sentence below.
Prompt	$6 + 4 = ?$
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	Mr. Baggy sells 6 lizards and 4 fish. He sold 10 pets.
Correct or Rationale	Correct.
B	Mr. Baggy has 6 birds. He sells 4 birds. He now has 10 birds.
Correct or Rationale	Students chose a situation that represents $6 - 4$ but that has the correct solution for $6 + 4$.
C	Mr. Baggy sells 6 cats and 4 dogs. He sold 2 pets.
Correct or Rationale	Student chose a situation that correctly represents $6 + 4$ but that has an incorrect solution.

Item #	5b
Discipline	Math
Grade Level	1
Module	2
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.3F (Readiness)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to generate and solve problem situations when given a number sentence involving addition or subtraction of numbers within 20
Item Type	Multiple Choice
Question Stem	Which story about Mr. Baggy's pet store best represents the number sentence below.
Prompt	$5 - 1 = ?$
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match

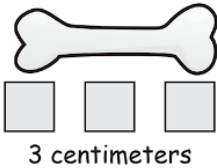

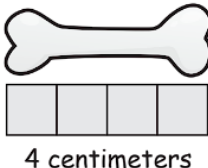

Rubric Notes	
Notes (where applicable)	
A	Mr. Baggy sells 5 frogs and 1 hermit crab. He sold 4 pets.
Correct or Rationale	Students chose a situation that represents $5 + 1$ but that has the correct solution for $5 - 1$.
B	Mr. Baggy has 5 hamsters. He sells 1 hamster. He now has 1 hamster.
Correct or Rationale	Correct.
C	Mr. Baggy has 5 ferrets. He sells 1 ferret. He now has 6 ferrets.
Correct or Rationale	Student chose a situation that correctly represents $5 - 1$ but that has an incorrect solution.

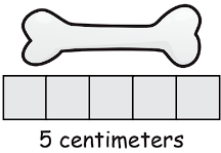

Item #	1b
Discipline	Math
Grade Level	1
Module	3
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.8C (Supporting)

Notes (where applicable)	In order to preserve alignment to the open ended nature of the part of the standard 1.8C that says “generate and answer questions using info from graphs”, this item needs to remain a constructed response item.															

Item #	2a
Discipline	Math
Grade Level	1
Module	3
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.7B (Supporting)
Strand	Geometry and measurement
Knowledge & Skills	The student applies mathematical process standards to select and use units to describe length and time.
Student Expectation	The student is expected to illustrate that the length of an object is the number of same-size units of length that, when laid end-to-end with no gaps or overlaps, reach from one end of the object to the other.
Item Type	Multi-Select Item
Question Stem	Which pictures show a correct measurement?  Is a centimeter cube.
Prompt	Select two that apply.
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	 <p>3 centimeters</p>
Correct or Rationale	Student chose an image in which the same-size units reach from one end of the object to the other but have gaps between them; did not recognize that a correct measurement would require the same-size units to be laid end-to-end with no gaps between them.
B	 <p>4 centimeters</p>
Correct or Rationale	Correct.

C	
Correct or Rationale	Student chose an image in which the same-size units are laid end-to-end with no gaps but reach beyond the ends of the object being measured.
D	
Correct or Rationale	Correct.
E	
Correct or Rationale	Student chose an image in which the units of length are not sized the same.

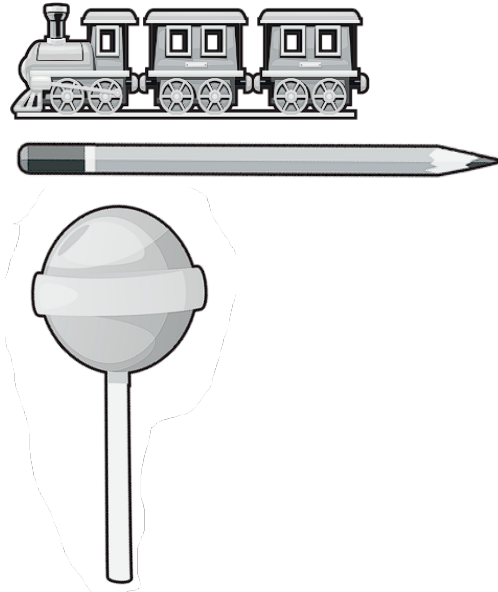

Item #	2b
Discipline	Math
Grade Level	1
Module	3
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.7B (Supporting)
Strand	Geometry and measurement
Knowledge & Skills	The student applies mathematical process standards to select and use units to describe length and time.
Student Expectation	The student is expected to illustrate that the length of an object is the number of same-size units of length that, when laid end-to-end with no gaps or overlaps, reach from one end of the object to the other.
Item Type	Multi-Select Item
Question Stem	What are three reasons the pictures you chose are correct?
Prompt	Select three that apply
Image(s)	
Image(s) Alt Text	
Number of Points	2
Scoring	Partial Match
Rubric Notes	

Notes (where applicable)	With the change to a machine scored item with distractor rationales, one suggestion may be to remove this part of the question entirely.
A	The number of units in each picture is the same.
Correct or Rationale	Student thought the number of units needed to be the same and did not account for the size of the units being different.
B	There are no gaps between the pieces used in each picture.
Correct or Rationale	Correct.
C	The units used in each picture are the same.
Correct or Rationale	Student thought that a correct measurement required the same units.
D	The pieces used to measure in each picture are the same size.
Correct or Rationale	Correct.
E	The pieces used to measure start at one end of the picture and go to the other end.
Correct or Rationale	Correct.

Item #	2c
Discipline	Math
Grade Level	1
Module	3
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.7D (Readiness)
Strand	Geometry and measurement
Knowledge & Skills	The student applies mathematical process standards to select and use units to describe length and time.
Student Expectation	The student is expected to illustrate that the length of an object is the number of same-size units of length that, when laid end-to-end with no gaps or overlaps, reach from one end of the object to the other.
Item Type	Inline Choice
Question Stem	Use the drop-down menus to show the length measurement for one of the correct pictures.
Prompt	[DROPDOWN1]
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	IMPORTANT SCORING NOTE: When a platform is chosen, this item will need to be set so that dropdown 1 can be scored as correct as 4 centimeters or 2 paperclips. We are only providing one drop-down (instead of the original question prompting for both lengths) to avoid the system giving students credit for entering the same answer twice.
[DROPDOWN1] Options * Correct	2 3 4 5 2 paper clips* 3 paper clips 3 centimeters 4 centimeters* 5 centimeters

Item #	2d
Discipline	Math
Grade Level	1
Module	3
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.7C (Supporting)
Strand	Geometry and measurement
Knowledge & Skills	The student applies mathematical process standards to select and use units to describe length and time.
Student Expectation	The student is expected to illustrate that the length of an object is the number of same-size units of length that, when laid end-to-end with no gaps or overlaps, reach from one end of the object to the other.
Item Type	Multiple Choice
Question Stem	In the picture below, the same crayon is correctly measured in two different ways.
Prompt	Which choice explains why these correct measurements are different?
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	The pieces used in each picture are different sizes.
Correct or Rationale	Correct.
B	The pieces used in each picture go from one end of the crayon to the other.
Correct or Rationale	Student chose a reason that explains why each measurement is correct but does not explain why they are different.
C	The pieces used in each picture are stacked with no gaps between them.
Correct or Rationale	Student chose a reason that explains why each measurement is correct but does not explain why they are different.

Item #	3a
Discipline	Math
Grade Level	1
Module	3
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.7A (Supporting)
Strand	Geometry and Measurement
Knowledge & Skills	The student applies mathematical process standards to select and use units to describe length and time.
Student Expectation	The student is expected to use measuring tools to measure the length of objects to reinforce the continuous nature of linear measurement
Item Type	Equation Editor (Math Short Answer)
Question Stem	Measure the length of the picture of each item with centimeter cubes.
Prompt	The pencil is [RESPONSE1] centimeters.

	The train is [RESPONSE2] centimeters. The lollipop is [RESPONSE3] centimeters.
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	<p>A few notes here:</p> <p>For this item to function, the platform chosen will need to have the ability to include a digital measuring tool</p> <p>The images will need to be oriented horizontally or vertically to make it easier for students to orient their digital measuring tools correctly.</p> <p>Some platforms may allow you to upload a custom measurement tool. We propose a custom measuring tool that is made of one dozen centimeter cubes stacked with no gaps between them. This will allow students to measure all of the given objects. If a custom measuring tool is not able to be generated by the chosen platform, a secondary option is to ask students to complete this measurement on paper.</p>
[RESPONSE1] Response(s)	11
[RESPONSE2] Response(s)	8
[RESPONSE3] Response(s)	9

Discipline	Math								
Grade Level	1								
Module	3								
Assessment Type	End-of-Module Assessment								
Standard (TEKS)	1.8A (Supporting)								
Strand	Data Analysis								
Knowledge & Skills	The student applies mathematical process standards to organize data to make it useful for interpreting information and solving problems.								
Student Expectation	The student is expected to collect, sort, and organize data in up to three categories using models/representations such as tally marks or T-charts.								
Item Type	Drag and Drop								
Question Stem	This picture shows fruit people took to a party.								
Prompt	<p>Count the total number of each type of fruit. Drag and drop the tally-marks into the chart below to represent the total number of each type of fruit.</p> <table border="1"> <thead> <tr> <th>Type of Fruit</th><th>Total</th></tr> </thead> <tbody> <tr> <td> Apples</td><td>[RESPONSE1]</td></tr> <tr> <td> Pineapples</td><td>[RESPONSE2]</td></tr> <tr> <td> Strawberries</td><td>[RESPONSE3]</td></tr> </tbody> </table>	Type of Fruit	Total	 Apples	[RESPONSE1]	 Pineapples	[RESPONSE2]	 Strawberries	[RESPONSE3]
Type of Fruit	Total								
 Apples	[RESPONSE1]								
 Pineapples	[RESPONSE2]								
 Strawberries	[RESPONSE3]

[RESPONSE3]	

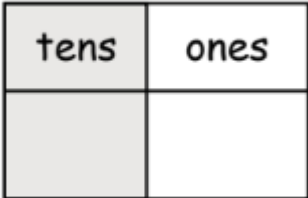

Item #	5
Discipline	Math
Grade Level	1
Module	3
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.8B (Readiness)
Strand	Data Analysis
Knowledge & Skills	The student applies mathematical process standards to organize data to make it useful for interpreting information and solving problems.
Student Expectation	The student is expected to use data to create picture and bar-type graphs.
Item Type	Graphing
Question Stem	Make a bar graph to organize the data in the picture and to show how many ducks, birds, and squirrels are at the park.
Prompt	N/A (see above stem)

Image(s)	<div><p>Animals at the Park</p><table><tr><td><div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div></td><td><div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div></td><td><div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div></td></tr><tr><td>ducks</td><td>birds</td><td>squirrels</td></tr><tr><td></td><td></td><td></td></tr></table><p> = 1 animal</p></div>	<div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div>	<div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div>	<div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div>	ducks	birds	squirrels

Standard (TEKS)	1.2F (Supporting)					
Strand	Number and Operations					
Knowledge & Skills	The student applies mathematical process standards to represent and compare whole numbers, the relative position and magnitude of whole numbers, and relationships within the numeration system related to place value.					
Student Expectation	The student is expected to order whole numbers up to 120 using place value and open number lines.					
Item Type	Drag and Drop - Ordering					
Question Stem	Order the numbers below from least to greatest.					
Prompt	[RESPONSE1]					
Image(s)						
Image(s) Alt Text						
Number of Points	1					
Scoring	Exact Match					
Rubric Notes						
Notes (where applicable)	<p>How this item will be structured depends significantly on the platform selected. Some platforms will allow a strict ordering item where students can rearrange the numbers in a single response field (as is indicated here), while others will require them to be placed in buckets, which would require a separate response field for each number. This will change how the prompt and response area will need to be designed.</p> <p>We would not suggest placing the open number line beneath the response area as students likely will not be able to customize how far apart they place the numbers (and the system will likely not recognize these differences). That said, if the platform allows it, it may be possible to place the number line beneath the response area.</p>					
Draggable Options (list)	3, 22, 19, 29, 35					
[RESPONSE1]	<table><tr><td>3</td><td>19</td><td>22</td><td>29</td><td>35</td></tr></table>	3	19	22	29	35

Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.2C (Readiness)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to represent and compare whole numbers, the relative position and magnitude of whole numbers, and relationships within the numeration system related to place value.
Student Expectation	The student is expected to use objects, pictures, and expanded and standard forms to represent numbers up to 120.
Item Type	Equation editor (Math Short Answer)
Question Stem	Think about the number 62.
Prompt	Write 62 using expanded form.
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
[RESPONSE1] Response(s)	$60 + 2 = 62$

Item #	10
Discipline	Math
Grade Level	1
Module	4
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.2F (Supporting)
Strand	Number and Operations

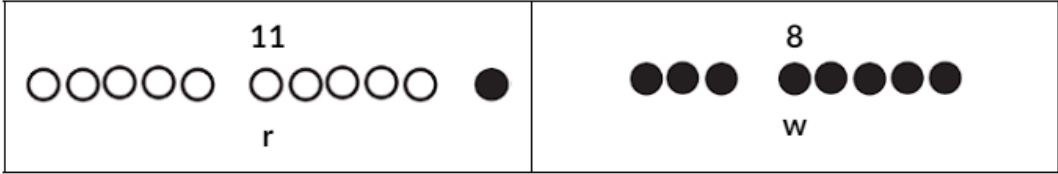

Knowledge & Skills	The student applies mathematical process standards to represent and compare whole numbers, the relative position and magnitude of whole numbers, and relationships within the numeration system related to place value.										
Student Expectation	The student is expected to order whole numbers up to 120 using place value and open number lines.										
Item Type	Multiple choice										
Question Stem	Four friends counted the number of building blocks they had.										
Prompt	Use your understanding of place value and determine which of the following lists shows the numbers of building blocks in order from least to greatest.										
Image(s)	<table border="1"> <thead> <tr> <th>Name</th><th>Number of Building Blocks</th></tr> </thead> <tbody> <tr> <td>Anh</td><td>31</td></tr> <tr> <td>Luis</td><td>13</td></tr> <tr> <td>Erin</td><td>12</td></tr> <tr> <td>Terrence</td><td>37</td></tr> </tbody> </table>	Name	Number of Building Blocks	Anh	31	Luis	13	Erin	12	Terrence	37
Name	Number of Building Blocks										
Anh	31										
Luis	13										
Erin	12										
Terrence	37										
Image(s) Alt Text											
Number of Points	1										
Scoring	Exact Match										
Rubric Notes											
Notes (where applicable)											
A	31, 13, 12, 37										
Correct or Rationale	Option A is incorrect. The student may or may not understand how to order whole numbers up to 40 and likely copied the original list of numbers.										
B	31, 12, 13, 37										
Correct or Rationale	Option B is incorrect. The student may or may not understand how to order whole numbers up to 40 and likely only compared the values of the digits in the ones place.										
C	12, 13, 31, 37										
Correct or Rationale	Option C is correct.										
D	37, 31, 13, 12										
Correct or Rationale	Option D is incorrect. The student may understand how to order whole numbers up to 40 but confused least to greatest with greatest to least.										

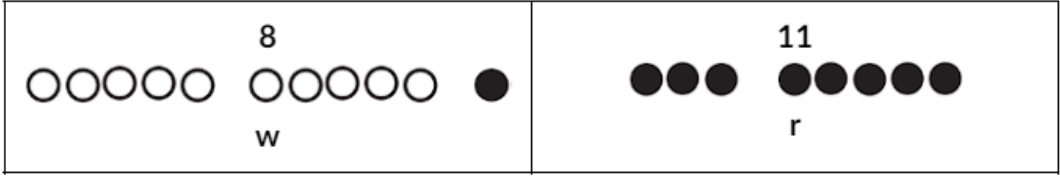

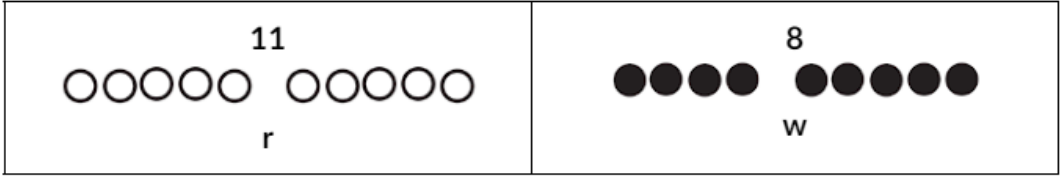

Grade 1 Module 4 End-of-Module Assessment Task

Item #	1a
Discipline	Math
Grade Level	1
Module	4
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.5D (Readiness)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to represent word problems involving addition and subtraction of whole numbers up to 20 using concrete and pictorial models and number sentences.
Item Type	Multiple Choice
Question Stem	Olivia is having a party for 17 of her friends. She already invited some friends. She has 12 more invitations to send.
Prompt	Which number sentence can be used to find the number of friends Olivia has already invited to the party?
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	Note that we suggested focusing this item on the number sentences as question 2a can be used to focus on pictorial models.
A	$17 + 12 = ?$
Correct or Rationale	Student selected a number sentence that adds the two given values to find an unknown; may have been unsure of how to represent an unknown in a different position.
B	$17 = 12 + ?$
Correct or Rationale	Correct.
C	$17 + ? = 12$
Correct or Rationale	Student mistook the role of 17 and 12 in the context of the problem.

Item #	1b
Discipline	Math
Grade Level	1
Module	4
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.3B (Readiness)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to use objects and pictorial models to solve word problems involving joining, separating, and comparing sets within 20 and unknowns as any one of the terms in the problem such as $2 + 4 = []$; $3 + [] = 7$; and $5 = [] - 3$.
Item Type	Equation editor (Math Short Answer)

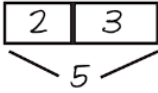

Question Stem	Use the RDW process to solve the following problem. Olivia is having a party for 17 of her friends. She already invited some friends. She has 12 more invitations to send.
Prompt	How many friends has Olivia already invited?

Item #	3a
Discipline	Math
Grade Level	1
Module	5
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.6B (Supporting)
Strand	Geometry and Measurement
Knowledge & Skills	The student applies mathematical process standards to analyze attributes of two-dimensional shapes and three-dimensional solids to develop generalizations about their properties.
Student Expectation	The student is expected to distinguish between attributes that define a two-dimensional or three-dimensional figure and attributes that do not define the shape.
Item Type	Multiselect
Question Stem	Select the attributes that are used to describe <i>all</i> cylinders.
Prompt	
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	Cylinders can roll.
Correct/Incorrect	Correct.
B	Cylinders are hollow.
Correct/Incorrect	Incorrect. Student thought that if a shape appearing to be a cylinder is solid, it would be named something other than a cylinder.
C	Cylinders are made of paper.
Correct/Incorrect	Incorrect. Student thought that if a shape appearing to be a cylinder is made from something other than paper, it would be named something other than a cylinder.
D	Cylinders have 2 faces made of circles or ovals.
Correct/Incorrect	Correct.

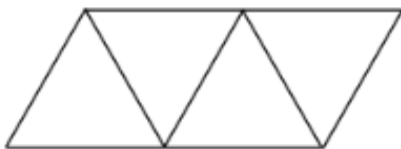

Item #	3b
Discipline	Math
Grade Level	1
Module	5
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.6B (Supporting)
Strand	Geometry and Measurement

Knowledge & Skills	The student applies mathematical process standards to analyze attributes of two-dimensional shapes and three-dimensional solids to develop generalizations about their properties.
Student Expectation	The student is expected to distinguish between attributes that define a two-dimensional or three-dimensional figure and attributes that do not define the shape.
Item Type	Multiselect
Question Stem	Select the attributes that are used to describe <i>all</i> rectangular prisms.
Prompt	
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	Rectangular prisms can roll.
Correct/Incorrect	Incorrect. Student thought that if a shape appearing to be a rectangular prism could not roll, it would be named something other than a rectangular prism.
B	The faces of a rectangular prism are rectangles.
Correct/Incorrect	Correct
C	Rectangular prisms have 6 faces.
Correct/Incorrect	Correct
D	Rectangular prisms are always blue.
Correct/Incorrect	Incorrect. Student thought that if a shape appearing to be a rectangular prism is a color other than blue, it would be named something other than a rectangular prism.

Item #	3c
Discipline	Math
Grade Level	1
Module	5
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.6B (Supporting)
Strand	Geometry and Measurement
Knowledge & Skills	The student applies mathematical process standards to analyze attributes of two-dimensional shapes and three-dimensional solids to develop generalizations about their properties.
Student Expectation	The student is expected to distinguish between attributes that define a two-dimensional or three-dimensional figure and attributes that do not define the shape.
Item Type	Multiselect
Question Stem	Select the attributes that are used to describe <i>all</i> triangular prisms.
Prompt	
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	

Notes (where applicable)	
A	Triangular prisms are big.
Correct/Incorrect	Incorrect. Student thought that if a shape appearing to be a triangular prism was not big, it would be named something other than a triangular prism.
B	Triangular prisms have 3 faces that are rectangles.
Correct/Incorrect	Correct
C	Triangular prisms have 2 faces that are triangles.
Correct/Incorrect	Correct
D	Triangular prisms are shiny.
Correct/Incorrect	Incorrect. Student thought that if a shape appearing to be a triangular prism was not shiny, it would be named something other than a triangular prism.

Item #	4a-c
Discipline	Math
Grade Level	1
Module	5
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.6F (Supporting)
Strand	Geometry and Measurement
Knowledge & Skills	The student applies mathematical process standards to analyze attributes of two-dimensional shapes and three-dimensional solids to develop generalizations about their properties.
Student Expectation	The student is expected to compose two-dimensional shapes by joining two, three, or four figures to produce a target shape in more than one way if possible.
Item Type	Constructed Response
Question Stem	
Prompt	Use your triangle pattern blocks to cover the shapes below. Draw lines to show how you made each shape with your triangles.
Image(s)	 <p>The image shows three geometric shapes labeled a, b, and c. Shape a is a parallelogram. Shape b is a larger parallelogram. Shape c is a trapezoid.</p>

Grade 1 Module 6 Mid-Module Assessment Task

Item #	1a
Discipline	Math
Grade Level	1
Module	6
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.5D (Readiness)
Strand	Algebraic Reasoning
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to represent word problems involving addition and subtraction of whole numbers up to 20 using concrete and pictorial models and number sentences.
Item Type	Multiple Choice
Question Stem	Brooks has 18 pencils. Aaron has 9 pencils.
Prompt	Which number sentence best represents how many fewer pencils Aaron has than Brooks?
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	$9 + ? = 18$
Correct	Correct.
B	$18 + ? = 9$
Rationale	Student chose an answer with an incorrect number sentence.
C	$18 + 9 = ?$
Rationale	Student chose an answer with an incorrect number sentence.

Item #	1b
Discipline	Math
Grade Level	1
Module	6
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.3B (Readiness)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to use objects and pictorial models to solve word problems involving joining, separating, and comparing sets within 20 and unknowns as any one of the terms in the problem such as $2+4=$ ___; $3+$ ___ $=7$; and $5 =$ ___ -3 .
Item Type	Equation Editor (Math Short Answer)

Item #	5
Discipline	Math
Grade Level	1
Module	6
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.2E (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to represent and compare whole numbers, the relative position and magnitude of whole numbers, and relationships within the numeration system related to place value.
Student Expectation	The student is expected to use place value to compare whole numbers up to 120 using comparative language.
Item Type	Multiple choice
Question Stem	Miguel thinks 92 ones is greater than 9 tens 2 ones.
Prompt	Which best explains whether Miguel is correct or incorrect.
Image(s)	
Image(s) Alt Text	
Number of Points	1

Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	Miguel is correct. 92 has a 2 in the ones place so it only has 2 ones.
Correct or Rationale	A is incorrect. Student did not realize that 92 could be described as 9 tens and 2 ones or as 92 ones.
B	Miguel is not correct. 92 ones is the same as 9 tens and 2 ones. 90 ones is 9 tens so $90 + 2 = 92$.
Correct or Rationale	B is correct.
C	Miguel is not correct. He cannot compare these numbers one of them (92) is just ones and the other (9 tens 2 ones) is both tens and ones.
Correct or Rationale	C is incorrect. Student thought that different place values could not be compared.

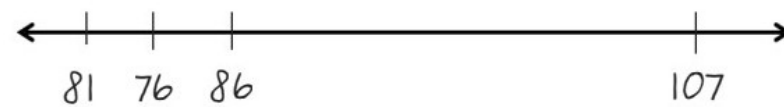

Item #	6a
Discipline	Math
Grade Level	1
Module	6
Assessment Type	Mid-Module Assessment
Standard (TEKS)	1.5C (Supporting)
Strand	Algebraic reasoning.
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to use relationships to determine the number that is 10 more and 10 less than a given number up to 120.
Item Type	Equation editor (Math Short Answer)
Question Stem	Find the mystery numbers.
Prompt	10 more than 90 is _____ Tens: 9 Ones: 0 Tens: _____ Ones: _____

Grade 1 Module 6 End-of-Module Assessment Task

Item #	1a		
Discipline	Math		
Grade Level	1		
Module	6		
Assessment Type	End-of-Module Assessment		
Standard (TEKS)	1.5D (Readiness)		
Strand	Algebraic Reasoning		
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.		
Student Expectation	The student is expected to represent word problems involving addition and subtraction of whole numbers up to 120 using concrete and pictorial models and number sentences.		
Item Type			
Question Stem	Taylor saves 12 coins. Wyatt saves 8 coins.		
Prompt	Choose the drawing and number sentence that represent how many more coins Tyler saves than Wyatt.		
Image(s)			
Image(s) Alt Text			
Number of Points	1		
Scoring	Exact Match		
Rubric Notes			
Notes (where applicable)			
A	<div style="display: flex; align-items: center; justify-content: space-around;"> <div style="text-align: center;"> T <input style="width: 80px; border: 1px solid black;" type="text" value="12"/> W <table border="1" style="display: inline-table; border-collapse: collapse; text-align: center;"> <tr> <td style="width: 40px; height: 20px;">8</td> <td style="width: 40px; height: 20px;">?</td> </tr> </table> </div> <div style="text-align: center;"> $8 - 12 = ?$ </div> </div>	8	?
8	?		
Correct or Rationale	A is incorrect. Student selected a model that represents the situation but chose an incorrect number sentence; perhaps thought the order of the values in a subtraction number sentence did not matter.		
B	<div style="display: flex; align-items: center; justify-content: space-around;"> <div style="text-align: center;"> T <input style="width: 80px; border: 1px solid black;" type="text" value="12"/> W <table border="1" style="display: inline-table; border-collapse: collapse; text-align: center;"> <tr> <td style="width: 40px; height: 20px;">8</td> <td style="width: 40px; height: 20px;">?</td> </tr> </table> </div> <div style="text-align: center;"> $12 - 8 = ?$ </div> </div>	8	?
8	?		
Correct or Rationale	B is correct.		
C	<div style="display: flex; align-items: center; justify-content: space-around;"> <div style="text-align: center;"> T <input style="width: 80px; border: 1px solid black;" type="text" value="12"/> W <table border="1" style="display: inline-table; border-collapse: collapse; text-align: center;"> <tr> <td style="width: 40px; height: 20px;">8</td> <td style="width: 40px; height: 20px;">?</td> </tr> </table> </div> <div style="text-align: center;"> $12 + 8 = ?$ </div> </div>	8	?
8	?		

Correct or Rationale	C is incorrect. Student interpreted the situation as requiring addition; perhaps relied on key words such as “more.”
----------------------	--

Item #	1b
Discipline	Math
Grade Level	1
Module	6
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.3B (Readiness)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to develop and use strategies for whole number addition and subtraction computations in order to solve problems.
Student Expectation	The student is expected to use objects and pictorial models to solve word problems involving joining, separating, and comparing sets within 20 and unknowns as any one of the terms in the problem such as $2 + 4 = []$; $3 + [] = 7$; and $5 = [] - 3$.
Item Type	Equation editor (math short answer)
Question Stem	How many more coins does Taylor save than Wyatt?
Prompt	Taylor saves [RESPONSE1] more coins than Wyatt.

Standard (TEKS)	1.2F (Supporting)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to represent and compare whole numbers, the relative position and magnitude of whole numbers, and relationships within the numeration system related to place value.
Student Expectation	The student is expected to order whole numbers up to 120 using place value and open number lines.
Item Type	Multiple choice
Question Stem	Binh collects game cards. Five of the cards have the numbers shown below.
Prompt	Which picture best shows the numbers correctly placed in order on the number line?
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
A	
Correct or Rationale	A is correct.
B	

Correct or Rationale	B is incorrect. Student chose a number line that orders the values based on the order they appear in the prompt.
C	
Correct or Rationale	C is incorrect. Student chose a number line that orders the values based on the value of the tens digit only and ignores any value in the hundreds place.

Item #	11
Discipline	Math
Grade Level	1
Module	6
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.5B (Supporting)
Strand	Algebraic reasoning.
Knowledge & Skills	The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.
Student Expectation	The student is expected to skip count by twos, fives, and tens to determine the total number of objects up to 120 in a set.
Item Type	Equation editor (Math Short Answer)
Question Stem	Fill in the missing numbers in the sequence.
Prompt	60, 62, _____, _____, 68, _____
Image(s)	
Image(s) Alt Text	
Number of Points	1
Scoring	Exact Match
Rubric Notes	
Notes (where applicable)	
Response1	64
Response2	66
Response3	69

Item #	12
Discipline	Math
Grade Level	1

Module	6
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.5B (Supporting)

Rubric Notes	
Notes (where applicable)	
Response1	100
Response2	115
Response3	120

Item #	13
Discipline	Math
Grade Level	1
Module	6
Assessment Type	End-of-Module Assessment
Standard (TEKS)	1.4C (Readiness)
Strand	Number and Operations
Knowledge & Skills	The student applies mathematical process standards to identify coins, their values, and the relationships among them in order to recognize the need for monetary transactions.
Student Expectation	The student is expected to use relationships to count by twos, fives, and tens to determine the value of a collection of pennies, nickels, and/or dimes.
Item Type	Hotspot
Question Stem	
Prompt	Select the two groups of coins that have the same value.
